

# Md.Mehady Hasan

## ABOUT ME

I'm Md.Mehady Hasan. I have completed my graduation. During graduation, I tried to become proficient in computer programming and learned a lot about this sector and learned different tools and completed a lot of projects. While studying for a bachelor's degree in public administration, I learned about the working of the administration as well as the overall knowledge of what an administrative system can be and how it can be improved. I want to give my best in my career by using my skills and education and always try to keep myself to the maximum by learning different things at different times and in different environments.
